

Auditory / Sensory Solutions

Roger Focus II

The Roger Focus II is a small, lightweight ear level receiver that sends the voice directly into the ear whilst reducing background noise.

This approach cuts out distracting noise, like nearby conversations or ambient noises allowing clearer and more comfortable understanding of speech.

Research found that children who wore Roger Focus II improved their speech understanding by an average of 53% compared to children who didn't wear the technology.

Combined with a Roger Touchscreen, ON or Select, students will have a clearer more focused opportunity to learn. The Touchscreen is compatible with a Soundfield, often installed in schools to help learning.

The Roger Focus II is available in a choice of 10 colours with 2 models—disposable 312 battery or rechargeable battery.

Roger Touchscreen

Roger Touchscreen is an easy to use wireless microphone and the core component of the Roger for Education portfolio. The Touchscreen gives students and teachers alike the opportunity to benefit from dynamic soundfield system. The Touchscreen has 3 intuitive directional microphones, 3.5mm audio input and an impressive 20 metre range

Roger Select

Roger Select™ is a small versatile microphone that can be worn by a presenter or placed on a table where background noise is present. When multiple conversations take place, the listener can manually select the microphone direction.

** Available in 3 colours.*

Roger ON

Roger™ ON has the ability to distinguish the direction of incoming speech and with pointing mode, users have the flexibility to choose the directional focus. The ON can be placed on a table, held in the hand or worn by a lecturer. Personal settings can be selected by using the myRogerMic app.

** Available in 2 colours.*
