

EDUCATION / TRAINING SOLUTIONS

Soundfield Systems help achieve the best possible learning experience for students, enabling them to hear the teacher's voice clearly in class. Benefits for both teachers and students include;

- Improved sentence recognition ability
- Increased attention, interaction and participation
- Quicker acquisition of reading, writing & numeracy skills
- Reduced teacher vocal strain
- Improved classroom management
- Can be used with face mask

DigiMaster 5000 V2 Soundfield Speaker

Delivering exceptional sound quality with the capability to produce crystal clear voices throughout a room, while reducing voice strain, distractions, background noise and feedback.

Roger Touchscreen Microphone

This easy to use microphone transmits the speaker's voice and audio feeds, whilst reducing background noise. The audio can be transmitted to the Soundfield speakers, directly to Roger receivers in hearing aids or to other portable Roger receivers such as the Roger Neckloop which links to telecoil enabled hearing aids.

- 3 intuitive directional microphones,
- 3.5mm audio input,
- Secure & private system,
- 2.4Ghz wireless transmission,
- 20 meter range.

Roger Pass-Around Microphone

The Roger Pass-around Microphone is designed to enhance classroom discussions so that not only teachers, but all students are heard clearly. The Roger Pass-around can be hand held or placed in the sturdy stand on a desk.

Roger Media Hub

In the modern classroom, teacher's lessons are often supported by video and audio sources such as interactive whiteboards or computers requiring students to listen to individual lessons like an audiobook or video clips. The Roger Multimedia Hub can be used to support both mixed (teacher and audio) and individual listening.

Charging Rack

The Charging Rack removes the need for multiple power points and charging cables, keeping equipment neat and fully charged in one central place.
