

CONTACTA COUNTER SOUND TRANSFER PACKAGE

Counter Sound Transfer Package

The speech transfer package provides assistance for clear two way communication where normal speech is impaired by the use of glass, a security screen or other similar barriers.

- Energy-saving “green” standby mode is automatically used, achieving a power saving of up to 80%
- Automatic Gain Control (ACG), compression, and noise gate to ensure even amplification
- Constant-current Loop drive (with engineer adjustable loop drive level)
- Isolated audio line input / output allows additional line level audio input or output to recording system
- LED column indicator aids adjustments and indicates power and status
- Continuous self-testing means that no specialized equipment is required to confirm functionality
- DC Power
- Power and status indication: Green/red LED column

Recommended Applications:

- Reception Desks
- Service Counters where protection barriers are installed
